Distributed Graph Processing - 2

Lecture 14

CSCI 4974/6971

20 Oct 2016

Today's Biz

1. **Reminders**
2. Review
3. Assignment 4
4. Distributed Graph Processing

Reminders

- Assignment 3: solution out Friday
- Assignment 4: out Friday - due 3 November
  - Setting up and running on CCI clusters
- Project Update Presentation: In class November 3rd
- Office hours: Tuesday & Wednesday 14:00-16:00 Lally 317
  - Or email me for other availability
- Tentative class schedule:
  - Today: Distributed graph processing
  - Thursday: Distributed graph processing - more advanced

Today's Biz

1. Reminders
2. Review
3. **Assignment 4**
4. Distributed Graph Processing

Assignment 4

1. Set up access to CCI clusters
2. Use distributed graph structure (Monday's class) to run PageRank/BFS
3. Use partitioning methodology (Today's class) to run PageRank/BFS
4. Examine strong scaling on fixed networks (comp/comm/idle)
5. Examine weak scaling on fixed networks (comp/comm/idle)

Today's Biz

1. Reminders
2. Assignment 4
3. **Review**
4. Distributed Graph Processing

Quick Review

Distributed Graph Processing

1. Can't store full graph on every node
2. Efficiently store local information - owned vertices / ghost vertices
   - Arrays for days - hashing is slow, not memory optimal
   - Relabel vertex identifiers
3. Vertex block, edge block, random, other partitioning strategies

Quick Review

Data	Size	Description
`n_global`	1	Global vertex count
`m_global`	1	Global edge count
`n_local`	1	Task-local vertex count
`n_ghost`	1	Ghost vertex count
`m_local_out`	1	Task-local out-edges count
`m_local_in`	1	Task-local in-edges count
`out_edges`	`m_out`	Array of out-edges
`out_offsets`	`n_loc`	Start indices for local out-edges
`in_edges`	`m_in`	Array of in-edges
`in_offsets`	`n_loc`	Start indices for local in-edges
`map`	`n_loc+n_gst`	Global to local id hash table
`local_unmap`	`n_loc`	Array for local to global id conv.
`ghost_unmap`	`n_gst`	Array for local to global id conv.
`tasks`	`n_gst`	Array storing owner of ghost vertices

Today's Biz

1. Reminders
2. Review
3. Assignment 4
4. **Distributed Graph Processing**
