

Beginning C for Engineers

HW1

Due: beginning of class 2

1. Read Chapter 1 and sections 2.1 to 2.4 from your text.
2. Explain in **words** the steps to write a program which computes the cost of building a house by asking the builder the cost of building each room.
3. Write a program to compute the cost of building a 3-bedrooms, 2 baths house by asking the cost of each room from a builder. You can assume additional cost of 20,000\$ for landscaping and a pool and that all numbers are whole numbers.
