

## Submission Information

---

1. For each program, except the project, you can submit a hard copy or print out of your program by the deadline.
2. Your project will be evaluated online, during the last class.

### Additional Information Regarding Programming Assignments

1. For each program, you must include the following information at the beginning of your source code:
  - **Your name**
  - **Your section number**

Failure to do so will result in a penalty of 5% for the programming assignment.

2. For each programming assignment, approximately 80% of the grade will be for correctness and the remaining 20% will be for structure and documentation. The documentation should include:
  - Header information (your name, ... as mentioned above) at the beginning of the program.
  - A general description of what the program does along with the descriptions of inputs to the program and the outputs produced by the program. Any assumptions that you make with respect to the inputs must be clearly stated.
  - For each function you must provide a description of what the function does in addition to the descriptions of all the parameters.

You can use the examples in your texts as a guide in documentation of your program.
