WHAT SHOULD WE BUILD?

Project teams will be formed at the beginning of Week 3
* Teams will be coordinated based on timezones and which section you are registered for
* Teams will meet twice per week (at minimum) except for Week 13 (Thanksgiving)

We need to generate project ideas!
* Go to the Discussion Forum and post an idea for a project using the “project ideas” category

Project ideas should include:
* Summary of what the software will do
* Potential stakeholders (i.e., who cares?)
* Description of users/audience (i.e., who will use it?)
* Potential risks and an assessment of feasibility

Do not talk about code (at all)!
