

## **Graph Mining Project Update**

Submit update presentation to Submittly by March 27th

**v1.0:** Last Updated March 15, 2026

Project update presentations will be on Monday March 23th and Thursday March 26th. Basic details are below:

1. Same groups as before. (But let me know of any changes)
2. 10-15 minutes for your presentation.
3. Order will be randomized, as before.
4. Presentations will be in person in class. Let me know of any issues ahead of time.

For your update presentation, you should be providing a not-insignificant update on the current status of your project. Some questions you should answer during your presentation are:

1. What was the broad goal for your project that you original proposed?
2. How has your work been progressing?
3. Do you have any interesting results to share?
4. Are there any unforeseen challenges?
5. Are there any adjustments needed to the original timeline?
6. What will you be working on over the next month?
7. Any questions for the class or instructor?

You can include any other results or interesting discussion that you think might be worthwhile to share or discuss.
